

Come to me, come to me									
Help me to love you									
<u>VERSE 2</u>									
Close your eyes, the tide'll bring you here with me									
We can be so calm									
Sink into my arms									
Hold on tight, you only want to be with me									
On a broken shore									
Now and evermore									
<u>PRECHORUS 2</u>									
I cross my heart, I tell no lies									
I see your future in my eyes									
I promise you a love so deep									
You'll hear me calling in your sleep									
Who needs to breathe the air above									
When we're both drowning in my love?									
The tides have turned don't be afraid									
You're not the only soul I've saved									
<u>CHORUS 2</u>									
Come to me, come to me									
Help me to love you									
Come to me, come to me									
Help me to love you									
Come to me, come to me									
Help me to love you									
Come to me, come to me									
Help me to love you
