

The sky will burn									
<u>CHORUS 2</u>									
Stepping out									
The shadows give no home									
Can't pretend									
I'm not all alone									
Don't need love									
This I know									
It's all promises and lies									
<u>VERSE 3</u>									
I can think of something									
We can do tonight									
Come down to the bottom									
We'll shoot out all the lights									
I will be your brother									
I will be your friend									
You can call me a mother									
Just don't say it again									
<u>CHORUS 3</u>									
Stepping out									
The shadows give no home									
Can't pretend									
I'm not all alone									
Don't need love									
This I know									
It's all promises and lies									
<u>REFRAINS</u>
